

FUSION CENTER PROGRAM DEVELOPMENT AND SUPPORT SERVICES **SNAPSHOT**

Establish a center of analytic excellence - by enhancing your ability to collect, analyze and share information with federal, state and local law enforcement, homeland security and the intelligence community.

Whether you're developing a pre-funding blueprint for a state-of-the-art fusion center - or focused on improving critical aspects of your existing center's core practices, technologies and capabilities - we can help.

Hillard Heintze provides fusion centers at the federal, state and local level with a wide range of program development services - from concept development, staffing analyses and SAR optimization, to integration and CompSTAT support.

FUSION CENTER PROGRAM DEVELOPMENT AND SUPPORT

- **Enhanced ability to collect, examine and share information with first responders on the ground and with federal law enforcement and intelligence officials at the state and national level**
- **Improved governance, collaboration and compliance**
- **Dramatically more efficient information collection through automation and web analytics**
- **Better integration of effective, functional and relevant technologies and improved data analysis, reporting and decision-making**
- **Improved efficiencies related to personnel, operations and business processes (Intake, Analyze, Disseminate, Archive)**

SCOPE OF SERVICES

Concept Development and Program Improvement

Comprehensive development of fusion center concept plans, including recommendations on leadership and staffing, phased-in technology roadmaps, process creation, milestones and benchmarks, budgets and potential sources of grants. Also comprehensive guidance on improving established programs in each of the areas outlined above.

Staffing, Policy and Compliance Reviews

Analysis of proposed or existing staffing requirements as well as policies, operating guidelines and standard operating procedures, including compliance with CFR 23 Part 28. Recommendations on improvements and guidance on execution.

Suspicious Activity Reporting (SAR) Optimization

Support and assistance in implementing or enhancing SAR processes, including evaluating alert, escalation and reporting thresholds and protocols and integration with established national practices and procedures such as Guardian.

GIS Integration Services

Guidance on the critical issues, challenges and best practices fundamental to integrating location-based data in the fusion center with other data resources, such as law enforcement, fire, public health and emergency management.

Crime Analysis and Trending (CompSTAT) Support

Assistance in helping police departments reduce crime through systematic data collection, automated crime pattern analysis, enhanced personnel and resource management and improved accountability.
